

Business Continuity & Supply Chain Resiliency Innovation & Growth

WHAT YOU WILL LEARN

In this program, we pull from over 25 years of execution experience, sharing the methods tools and insights proven to work. You will learn foundational skills to develop an initial strategy, scenario options, and business continuity plans that you can use to get an immediate impact.

In this course you'll learn advanced and in-depth methods on:

- Mindset Neuroscience, Grit and the Psychology of Individuals & Teams
- The 5 components of a compelling Strategy
- Understanding Starting with Why, Purpose, Method & End State
- Soft Skills, team dynamics, and the leadership behaviors needed to build the teams to facilitate and problem-solve solutions.
- Application and use of systems thinking applied to business disruption, scenario planning, and execution.
- Creating the psychologically safe environments and team mindsets for structured brainstorm/create sessions.
- How to build teams and lead collaboration with others, including your key suppliers.
- How to "amplify empathy" to build teams by understanding problems to solve and jobs to be done.
- Hard Skills, in tools, templates, and methods to support your organization's business continuity supply chain resiliency efforts.
 - Strategy Development
 - Scenario Planning
 - Business Continuity Planning
 - Supply Chain Risk, Recovery, and Supplier Relationship Optimization
 - This session includes access to digital pre-work released 1week prior to the program
 - Upon completion of the program a Business Continuity and Supply Chain Resiliency Playbook to support your recovery efforts.
- **BONUS CONTENT:** Post session, attendees can schedule an optional 1 hour digital strategy, scenario planning or business continuity plan review with The Innovation Garage®. In this session, we can review your organization's initial draft plans, and offer insight and support suggestions for successful execution.

HOW IT WORKS

- 1) Convenient On-Line Digital Classes & Survey's:** One week before attending the session, you take a short strengths assessment, business continuity and risk survey, and watch a few short videos.
- 2) Practical "Live" Digital Classes:** The live session meets for 2 hours, 3 days consecutively, in the same week. Via a digital connection platform, you'll roll up your sleeves through interactive experiences. This helps to cover the content in a dynamic, fast paced way. The session includes several digital breakouts with case stories, During these breakouts, you can collaborate with your cross industry class cohort on practical exercises that demonstrate and apply the skills you are learning.
- 3) Valuable Application to Your Work:** You'll get started applying the new mindset, systems, and tools to your work – connecting the dots from theory into practical application.

- 4) **Dual Certification Credits:** The course is credentialed by **both** *Baldwin Wallace University* and *The Project Management Institute*.
- 5) **Earn .6 CEU's** from *Baldwin Wallace University* and **6.0 PDU's** (2.0 Technical/2.0 Leadership/2.0 Strategy) from *The Project Management Institute*.
- 6) **Post Session:** Post session, consider scheduling the plan review call or attending (or having your teams attend) a 1 Day Innovation 101 program (with optional Green Belt Certification) or an extended 3.0 day Innovation program (with optional Blue Belt Certification). These education programs, with optional certification, help build your organizations capability and confidence for growth. Always, with the help of a master black belt from *The Innovation Garage®*, providing on-site or virtual coaching supporting your team's success.
