PLEASE READ INSTRUCTIONS CAREFULLY: Make an appointment with your licensed clinician for a general physical. Take the Immunization Form along with any documentation of immunizations, as outlined below, to your licensed clinician for review and verification. Once your clinician has reviewed your records, administered immunizations or drawn blood for titers as needed, he/she must complete, sign and date the form.

Requirements

1. **Tuberculin (Tb) Testing:** The two-step Mantoux Tb skin test is required to be completed by the student’s healthcare provider as part of the BW Health Form. This is an annual requirement of the affiliating clinical agencies and will need to be repeated by the student during the program prior to expiration with documentation provided to the Speech-Language Pathology Program. Students who have a medical history of a false positive, allergy to the Mantoux test, BCG vaccination, or are a converter are **required** to undergo Tb QuantiFERON testing (interferon-gamma release assay [IGRA] for Tb infection through their provider, annually.

2. **Immunizations:**
   a. **MMR (Rubeola aka: Measles, Mumps, and Rubella)** Two vaccinations are required after one year of age and at least one month apart, or one MMR vaccination within the last six (6) years. Titers indicating immunity is also acceptable.
   
   b. **Adult Diphtheria Tetanus** within the last ten (10) years. If it has been more than two (2) years since your last Adult Diphtheria Tetanus, we highly recommend receiving the Tdap.
   
   c. **Tdap (Tetanus, Diphtheria, and Pertussis)** - Tdap can be received only one time as an adult.
   
   d. **Hepatitis B Vaccination** - Dates of all three injections are required. Titers indicating immunity is also acceptable. Since Hep B is a series of three injections over the course of four months; it may not be completed before the deadline. Please start the series immediately and submit documentation as each future injection is completed.
   
   e. **Varicella** – Date of immunization (series of two injections two months apart if vaccine was received after June 2006), date of disease, or titers are acceptable.
   
   f. **Polio Vaccine** - Most adults received the polio vaccination as children. If documentation cannot be located to document this, then proof of immunity is required.

3. **Physical examination** within the summer prior to initial enrollment in the program. Please refer to the attached “Essential Functions for Speech-Language Pathology Students”.

Essential Functions for Speech-Language Pathology Students
Master of Science – Speech Language Pathology

Students admitted to the Baldwin Wallace University Master of Science Speech-Language Pathology Program must present documentation of a satisfactory health examination report. As a guest of the health care facilities that provide clinical experiences for the Master of Science Speech-Language Pathology Program, students are subject to the policies of the agency, which often include the ability to work safely and effectively with patients. Since clinical experiences are an essential element of the Master of Science Speech-Language Pathology Program, the inability to perform the duties required of a speech-language pathology professional at any point during the program may result in dismissal.

The University endorses the Americans with Disabilities Act and will endeavor to provide reasonable accommodations for all students with documented disabilities while ensuring the academic integrity of its programs. Students with disabilities who are seeking accommodations should contact the Baldwin Wallace University Office of Disability Services, 207 Ritter Library. Baldwin Wallace University does not discriminate in admission or treatment of students on the basis of disability.

In order to acquire the knowledge and skills requisite to the practice of speech-language pathology, to function in a broad variety of clinical situations, and to render a wide spectrum of patient care, individuals must have skills and attributes in five areas: communication, motor, intellectual-cognitive sensory-observational, and behavioral-social. These skills enable a student to meet graduate and professional requirements as measured by state licensure and national certification. Many of these skills can be learned and developed during the course of the graduate program through coursework and clinical experience. The starred items (*), however, are skills that are most inherent and should be present when a student begins the program.

Communication -- A student must possess adequate communication skills to:

- Communicate proficiently in both oral and written English language. (Language to be determined by program.)*
- Possess reading and writing skills sufficient to meet curricular and clinical demands.*
- Perceive and demonstrate appropriate non-verbal communication for culture and context.*
- Modify communication style to meet the communication needs of patients, caregivers, and other persons served.
- Communicate professionally and intelligibly with patients, colleagues, other healthcare professionals, and community or professional groups.
- Communicate professionally, effectively, and legibly on patient documentation reports, and scholarly papers required as a part of coursework and professional practice.
- Convey information accurately with relevance and cultural sensitivity.
Motor – A student must possess adequate motor skills to:

- Sustain necessary physical activity level in required classroom and clinical activities.*
- Respond quickly to provide a safe environment for patients in emergency situations including fire, choking, etc.**
- Access transportation to clinical and academic placements.*
- Participate in classroom and clinical activities for the defined workday.*
- Efficiently manipulate testing and treatment environment and materials without violation of testing protocol and with best therapeutic practice.
- Manipulate patient-utilized equipment (e.g. durable medical equipment to include AAC devices, hearing aids, etc.) in a safe manner.
- Access technology for clinical management (i.e. billing, charting, therapy programs, etc.).

Intellectual/Cognitive – A student must possess adequate intellectual and cognitive skills to:

- Comprehend, retain, integrate, synthesize, infer, evaluate and apply written and verbal information sufficient to meet curricular and clinical demands.*
- Identify significant findings from history, evaluation, and data to formulate a diagnosis and develop a treatment plan.
- Solve problems, reason, and make sound clinical judgments in patient assessment, diagnostic and therapeutic plan and implementation.
- Self-evaluate, identify, and communicate limits of one’s own knowledge and skill to appropriate professional level and be able to identify and utilize resources in order to increase knowledge.
- Utilize detailed written and verbal instruction in order to make unique and dependent decisions.

Sensory/Observational – A student must possess adequate sensory skills of vision, hearing, tactile, and smell to:

- Visually and auditorily identify normal and disordered – fluency, articulation, voice, resonance, respiration characteristics, oral and written language in the areas of semantics, pragmatics, syntax, morphology and phonology, hearing and balance disorders, swallowing cognition, social interaction related to communication.
- Identify the need for alternative modalities of communication
- Visualize and identify anatomic structures
- Visualize and discriminate imaging findings.
- Identify and discriminate findings on imaging studies.
- Discriminate text, numbers, tables, and graphs associated with diagnostic instruments and tests.
- Recognize when a patient’s family does or does not understand the clinician’s written and or verbal communication.
Behavioral/Social -- A student must possess adequate behavioral and social attributes to:

- Display mature empathetic and effective professional relationships by exhibiting compassion, integrity, and concern for others.*
- Recognize and show respect for individuals with disabilities and for individuals of different ages, genders, race, religions, sexual orientation, and cultural and socioeconomic backgrounds.*
- Conduct oneself in an ethical and legal manner, upholding the ASHA Code of Ethics and University and federal privacy policies.*
- Maintain general good physical and mental health and self-care in order not to jeopardize the health and safety of self and others in the academic and clinical settings.*
- Adapt to changing and demanding environments, which includes maintaining both professional demeanor and emotional health
- Manage the use of time effectively to complete professional and technical tasks within realistic time constraints.
- Accept appropriate suggestions and constructive criticism, and respond by modification of behaviors.
- Dress appropriately and professionally.

Please note: Students must be completely and fully medically cleared to be in the clinical setting without restrictions throughout the entire program.

Students will not be permitted into the clinical setting wearing casts, braces, splints, or with open and healing wounds, or any other medical conditions/applications that could adversely affect their work with and safety of patients.

* Many skills can be learned and developed during the course of the graduate program through coursework and clinical experience. The starred items (*), however, are skills that are most inherent and should be present when a student begins the program.
