

Baldwin Wallace University Community Research Institute – Topline Release- April 9, 2018

Methodology

This poll was conducted between February 28, 2018, and March 9, 2018, among registered voters in Ohio (n=1,011), by Baldwin Wallace University's Community Research Institute. Respondents were selected to participate from an online panel Qualtrics curated. To overcome some of the limitations associated with online surveys, Qualtrics utilized quotas for gender (51% female) and age (18-29 years - about 16.9%; 30-44 years - about 24.5%; 45-64 years - about 34.9%; and 65 years and up - about 23.7%) based on data from the 2016 American Community Survey (ACS) for Ohio. The data were weighted by party identification (26.5% Republican, 16.9% Democrat, and 56.5% Independent) based data from on the Ohio Voter Project. Educational attainment, household income, race, and ethnicity were also weighted based on the 2016 ACS to reflect general population parameters.
